Key Takeaways

Descriptive Analysis

(April 2023 - October 2024)

The emergency room dataset spans 19 months and includes a total of 9,216 unique patients.

Patient Wait Time & Satisfaction

The average wait time is **35.3 minutes**, indicating opportunities to improve patient flow. The average satisfaction score is **4.99 out of 10**, reflecting moderate satisfaction and highlighting areas for improvement in patient experience.

Departmental Referrals

A large portion of patients (**5,400**) did not require referrals. Among those referred, the most common departments were **General Practice (1,840 cases)** and **Orthopedics (995 cases)**, followed by **Physiotherapy (276 cases)** and **Cardiology (248 cases)**.

Peak Busy Periods

The busiest days are **Mondays (1,377 patients)**, **Saturdays (1,322 patients)**, and **Tuesdays (1,318 patients)**. Peak hours occur around **11 AM, 1 PM, 7 PM, and 11 PM**, indicating higher demand during these times.

Patient Demographics

Adults aged **30–39 years** represent the largest group (**1,200 patients**), followed by ages **20–29 years (1,188 patients)**. Other significant groups include patients aged **40–50 years**.

Race Distribution

The largest racial group is **White (2,571)**, followed by **African American (1,951)**, **Multiracial (1,557)**, and **Asian (1,060)**. Additionally, **1,030 patients** did not disclose their race.

Admission Patterns

Nearly half of the patients (**4,612**) were admitted, while **4,604** were treated and released.

Summary

The dataset shows high patient volumes with moderate satisfaction levels and frequent referrals to General Practice and Orthopedics. Mondays and late evening hours are particularly busy. Patient demographics are diverse across age and race, with nearly equal proportions of admitted and non-admitted patients. These insights can help improve staffing, resource allocation, and overall patient care in the emergency department.
